

ACKNOWLEDGEMENTS

Sincere acknowledgements are extended to the many people and organizations who provided information for the development of this report. The U.S. Bureau of Mines at Schuylkill Haven supplied valuable information on mine pool levels. Mine maps and previous mine drainage data were provided by the Pottsville office of the Department of Environmental Resources. Field assistance and additional mine maps were given by the mine inspectors of the region. The Division of Mine Area Restoration, Department of Environmental Resources, provided valuable information on abatement and mine drainage treatment systems. Appreciation is also extended to the Sunshine Mining Company for cooperation in the Zerbe Subwatershed.
