

BIBLIOGRAPHY

Abatement of Pollution from Abandoned Coal Mines by Means of In-Situ Precipitation Techniques: James B. Jones and Sam Ruggeri.

Abatement Procedures Related to Acid Mine Drainage: Cooper H. Wayman, Dept. of Chemistry, Colorado School of Mines, (69-36), April, 1969.

Acidity - Alkalinity (pH): Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (May, 1972).

Air-Sealing Coal Mines to Reduce Water Pollution: N.N. Moebis and Stephen Krickovic, U. S. Dept. of the Interior, Bureau of Mines (Report of Investigations 7354, March, 1970).

Annual Runoff in the Conterminous United States: Mark W. Busby, Dept. of the Interior, U.S. Geological Survey (Hydrologic Investigations Atlas HA - 212), (1966).

Antidegradation: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (September, 1971).

Aquatic Biological Investigation: Gerald Jarmuz, H.S. Region V, Pittsburgh, Pa. (October, 1971).

Bacteria Criteria: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (April, 1972).

Bio-Assays for Other Parameters: Symposium in Water Quality Criteria, Sport Fisheries Institute.

Biological Aspects of Water Pollution: Charles Wilber

Bituminous Coal Fields of Pennsylvania: George H. Ashley, Introductory Volume, Part I, Topographic and Geologic Survey Bulletin M6, Part I, (1928).

Bituminous Coal Fields of Pennsylvania: James D. Sisler, Pennsylvania Geological Survey Bulletin M6 Part II, (1961).

Bituminous Coal Fields of Pennsylvania "Coal Resources": John F. Reese and James D. Sisler, Topographic and Geologic Survey Bulletin M6, Part III (1928).

Bituminous Coal Fields of Pennsylvania "Coal Analysis": United States Bureau of Mines, Topographic and Geologic Survey Bulletin M6 Part IV, (1928).

Chemical Quality of Public Water Supplies of the United States and Puerto Rico, 1962: Charles H. Durfor and Edith Becker, Dept. of the Interior, U.S. Geological Survey, Hydrologic Investigations Atlas HA-200, (1964).

Coal in Pennsylvania: William E. Edmunds and Edwin F. Koppe, Pennsylvania Topographic and Geologic Survey, Educational Series No. 7, (1968).

Coal Resources of the United States, January 1, 1967: Paul Averitt, Geological Survey Bulletin 1275.

Concentrated Mine Drainage Disposal Into Sewage Treatment Systems: by Environmental Research and Applications, Inc. Wilton, Connecticut), for Environmental Protection Agency, Program No. 14010 FBZ, (September, 1971).

Control of Acid Mine-Drainage: Compiled by Coal Industry Advisory Committee, Ohio River Valley Water Sanitation Commission, (March, 1964).

Control of Mine Drainage from Coal Mine Mineral Wastes: by Truax-Traer Coal Company (Pinckneyville, Illinois), for Environmental Protection Agency, Project No. 14010 DDH, (August, 1971).

Conversion of Mine Drainage to Potable Water by Sulfate Cycle Ion Exchange: Office of Research and Development, Federal Water Pollution Control Admin., Information Sheet, Project No. 14010 FZF.

Cost of Reclamation and Mine Drainage Abatement - Elkins Demonstration Project: Robert B. Scott, Ronald D. Hill and Roger C. Wilmoth, Environmental Protection Agency, Water Quality Office, Publication No. 14010---10/70, (October 21-23, 1970).

Demonstration of the Techniques of Refuse of Treated Active Surface Mine Drainage for Revegetation Augmentation: Office of Research and Development, Federal Water Pollution Control Admin., Wash., D.C., Information Sheet, Project No. 14010 HHG, (June, 1971).

Detection of Abandoned Underground Coal Mines by Geophysical Methods: HRB-Singer, Incorporated (State College, Pa.), for Environmental Protection Agency and Pennsylvania Dept. of Environmental Resources, Project 14010 EHN, (April, 1971).

Dewatering of Mine Drainage Sludge: U.S. Environmental Protection Agency, Water Pollution Control Research Series 14010 FJX 12/71.

Disinfection: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (May, 1971).

Dissolved Oxygen Criteria: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (April, 1972).

Ecology of Fishes, The: Nikdsky, Academic Press, New York, (1963).

Economic Effects of Mine Acid Drainage on Fish Life: Frank Kline, M. S. Thesis, (1969).

Effects of Various Gas Atmospheres on the Oxidation of Coal Mine Pyrites, The: by Cyrus Wm. Rice Division -- NUS Corporation (Pittsburgh, Pa.), for Environmental Protection Agency, Program 14010 ECC, (August, 1971).

Electrochemical Removal of Heavy Metals from Acid Mine Drainage: Office of Research and Development, Federal Water Pollution Control Administration, Information Sheet, Project No. 14010 GAO.

Electrochemical Treatment of Acid Mine Waters: by Tyco Laboratories, Inc. (Waltham, Massachusetts), for Environmental Protection Agency, Project No. 14010 FNQ, (February, 1972).

Evaluation of a New Acid Mine Drainage Treatment Process: by Black, Sivalls & Bryson, Inc. (Pittsburgh, Pa.), for Environmental Protection Agency, Water Quality Office, Program No. 14010 DYI, (February, 1971).

Factors that Affect the Formation of Coal Mine Drainage Pollution in Appalachia: Walter C. Lorenz, U.S. Dept of the Interior, Bureau of Mines, Area 1 Mineral Resources Office, Pittsburgh, Pa. (1967).

Feasibility Study on the Application of Various Grouting Agents, Techniques and Methods to the Abatement of Mine Drainage Pollution: Report by Halliburton Company for U.S. Department of the Interior, Federal Water Pollution Control Administration, Part I (August 9, 1967); Part IV (April 15, 1968).

Feasibility Study -- Upper Meander Creek Mine Drainage Abatement Project: by Stanley Consultants (Cleveland, Ohio), for Environmental Protection Agency, Project No. 14010 HBQ, (September, 1971).

Foam Separation of Acid Mine Drainage: by Horizons Incorporated (Cleveland, Ohio), for Environmental Protection Agency, Project No. 14010 FUI, (October, 1971).

Fourth Symposium on Coal Mine Drainage Research: by Coal Industry Advisory Committee, et. al., to Ohio River Valley Water Sanitation Commission, (1972).

Freshwater Fishery Biology: K. Lagler, Wm. C. Brown and Company, (1956).

Geology and Mineral Resources of Southern Somerset County: Norman K. Flint

Geologic Atlas - Somerset - Windber Folio #224: G. B. Richardson

Ground Water Program for Pennsylvania, The: Pennsylvania Geological Survey, 4th Series, Information Circular 7, (1956).

Guide for Revegetating Bituminous Strip-Mine Spoils in Pennsylvania, A: Research Committee on Coal Mine Spoil Revegetation in Pennsylvania, (1965).

Hydrogeologic Considerations for Sealing Coal Mines: D. R. Thompson, and Grover H. Emrich, (Aug. 8, 1968).

Hydraulics of Sediment Transport: Walter Hans Graf, McGrawHill, (1971).

Ichthyology: K. Lagler, John Wiley and Sons, New York, (1962).

Journal of Experimental Biology: Volume 17, P.435

Lake Hope Mine Drainage Demonstration Project: Office of Research and Development, Federal Water Pollution Control Administration, Wash., D.C., Information Sheet Project No. 14010 HJQ.

Legal Problems of Coal Mine Reclamation: Everett F. Goldbert and Garrett Powers, (The University of Maryland School of Law), E.P.A. Grant No 14010 FZU, (March, 1971).

Limestone in Mine Drainage Treatment: Maurice Duel, Environment Control Science, Bureau of Mines, U.S. Dept. of the Interior, Pittsburgh, Pa.

Limestone Treatment of Acid Mine Drainage: Ronald D. Hill and Roger C. Wilmoth, Society of Mining Engineers Meeting, (October, 1970).

Mercury and Heavy Metals: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D. C., (May, 1971).

Microbiological Treatment of Acid Mine Drainage Waters: by Continental Oil Company, Research Development Department, for Environmental Protection Agency, Grant No. 14010 ENW, (Sept., 1971).

Mine Drainage Pollution Control Reports: Water Quality Office, Environmental Protection Agency, Cincinnati, Ohio, (July, 1971).

Mine Drainage Treatment: State of the Art and Research Needs: Ronald D. Hill.

Mine Drainage Treatment Processes - Fact and Fiction: G. L. Barthauer, Proceedings of the West Virginia Coal Mining Institute.

Mine Spoil Potentials for Water Quality and Controlled Erosion: by Division of Plant Sciences, West Virginia University (Morgantown, W. Va.), for Environmental Protection Agency, Project No. 14010 EJE, (December, 1971).

Mine Water Research: Plant Design and Cost Estimates for Limestone Treatment: Edward A. Mihok, U.S. Dept. of the Interior, Bureau of Mines (Report of Investigations 7368), (April 1970).

Mineral Resources of the Appalachian Region: U.S. Geological Survey and U.S. Bureau of Mines Paper 580,(1968).

Mixing Zones: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (May, 1972).

Neutradesulfating Treatment Process for Acid Mine Drainage: by Catalytic, Incorporated for Environmental Protection Agency, Program No. 14010 DYH, (December, 1971).

Nitrates: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Washington, D.C., (November, 1971).

Ocean Research Index: Fish and Wildlife Service, Bureau of Commercial Fisheries, Wash., D.C.

Oxidation of Coal Mine Pyrites: Walter C. Lorenz and Edward C. Tarpley, U.S. Dept. of the Interior, Bureau of Mines (Report of Investigations 6247), (1963).

Oxidation of Ferrous Iron in Coal Mine Water with Activated Carbon Catalysts: Office of Research and Development, Federal Water Pollution Control Administration, Wash., D.C., Information Sheet, Project No. 14010 GYH, (April 28, 1971).

Oxidation of Pyrite Associated with Coal Mines, The: Walter C. Lorenz, Development of Water Resources in Appalachia, U.S. Dept. of the Interior, Bureau of Mines (1968).

Oxygenation of Ferrous Iron: The Rate-Determining Step in the Formation of Acidic Mine Drainage: Philip C. Singer and Werner Stumm.

Pennsylvania Department of Fisheries Bulletin

Pennsylvania's Ten Year Mine Drainage Pollution Abatement Program for Abandoned Mines -- A Progress Report: (April, 1968).

People (and water) - Water (and people): Report to the People of Pennsylvania by Pennsylvania Department of Health, Sanitary Water Board, Division of Sanitary Engineering, Harrisburg, Pa.

Phosphate Criteria: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Stand Wash., D.C., (June, 1971).

Physiology of Fishes, The: M. Brown, Academic Press, New York, Volume 1 and 2, (1957).

Pilot Plant Purification of Acid Mine Drainage by Reverse Osmosis: Office of Research and Development, Federal Water Pollution Control Administration, Information Sheet, Project No. 14010 HED.

Pilot Plant Study of the Autopurification of Sewage Effluent - Acid Mine Drainage Mixtures: Daniel C. McLean and Joseph A. Wernham, Institute for Research and Land and Water Resources, The Pennsylvania State University, Research Publication #55 (Nov. 1968).

Pilot Scale Study of Acid Mine Drainage: by The Ohio State University (Columbus, Ohio), for Water Quality Office, Environmental Protection Agency, Program No. 14010 EXA, (March, 1971).

Pollution Control Costs in Mine Drainage Management: U.S. Dept. of the Interior, Federal Water Pollution Control Administration, (December, 1966).

Principles of Hydrology: R.C. Ward, McGraw-Hill Publishing Co., (1967).

Progress in Controlling Acid Mine Water, A Literature Review: Walter C. Lorenz, U.S. Dept. of the Interior, Bureau of Mines (Information Circular 8080), (1962).

Public Water Supply Manual: Pa. Dept. of Environmental Resources, Bureau of Water Quality Management, Harrisburg, Pa., (November, 1971).

Reclamation and Revegetation of 640 Acres of Surface Mines, Elkins, West Virginia: Ronald D. Hill, U.S. Dept. of the Interior, Federal Water Pollution Control Adm. Mine Drainage Pollution Control Activities, (1969).

Recovery of Dry, Sulfur-free Iron Ore from Acid Mine Effluent: Office of Research and Development, Federal Water Pollution Control Administration, Information Sheet, Project No. 14010 HKM, (May, 1971).

Restoration of a Terrestrial Environment - The Surface Mine: Ronald D. Hill, Environmental Protection Agency, Water Quality Office - Publication No. 14010 -- 04/71, (April, 1971).

Restoring Surface-Mined Land: U.S. Dept. of Agriculture, Miscellaneous Publications No. 1082, (April, 1968).

Review of Current Research on Coal Mine Drainage in Appalachia: Walter C. Lorenz, U.S. Dept. of the Interior, Bureau of Mines, (1967).

Rotary Precoat Filtration of Sludge From Acid Mine Drainage, Neutralization: by Johns-Manville Products Corporation (Manville, N.J.), for Commonwealth of Pennsylvania Coal Research Board and Water Quality Office Environmental Protection Agency Grant No. 14010 DII, (May, 1971).

Rules and Regulations: Sanitary Water Board, Commonwealth of Pennsylvania, Department of Health.

Soil and Water Conservation of Engineering: Frevert, et. al., (Wiley, 1967).

Special Ichthyology: G. Nikolskii, National Science Foundation, Washington, D.C., (1961).

Stream Pollution by Coal Mine Drainage in Appalachia: U.S. Dept. of the Interior, Federal Water Pollution Control Administration, Mine Drainage Abstracts 67-182, (1967).

Stream Quality in Appalachia as Related to Coal-Mine Drainage - 1965: J. E. Biesecker and J. R. George, U.S. Dept. of the Interior, U.S. Geological Survey Circular 526, (1966).

Studies on Densification of Coal Mine Drainage Sludge: by Bituminous Coal Research, Inc. (Monroeville, Pa.), for Environmental Protection Agency, Project No. 14010 EJT, (September, 1971).

Studies on the Kinetics of Iron (II) Oxidation in Mine Drainage: by Wilkes College Research and Graduate Center to the Federal Water Pollution Control Administration, (September 25, 1968).

Studies on Limestone Treatment of Acid Mine Drainage: by Bituminous Coal Research, Inc. (Monroeville, Pa.), for Commonwealth of Pa., Dept. of Mines and Mineral Resources, and The Federal Water Pollution Control Admin., Dept. of the Interior, Grant No. 14010 EIZ, (January, 1970).

Studies of Limestone Treatment of Acid Mine Drainage - Part II: U.S. Environmental Protection Agency, Water Pollution Control Research Series 14010 EIZ 12/71.

Studies on the Removal of Manganese from Mine Drainage: Office of Research and Development, Federal Water Pollution Control Admin., Wash., D.C., Information Sheet, Project No. 14010 GSI, (April 23, 1971).

Study of Sulfur Recovery from Coal Refuse: by Black, Sivalls, & Bryson, Inc. (Pittsburgh, Pa.), for Environmental Protection Agency, Project No. 14010 FYY, (September, 1971).

Survey of Costs on Methods for Control of Acid Mine Drainage Pollution: Walter C. Lorenz and Robert W. Stephan, U.S. Dept. of the Interior, Bureau of Mines, (1968).

Third Symposium on Coal Mine Drainage Research: by Coal Industry Advisory Committee, et. al., for Ohio River Valley Water Sanitation Commission, (1970).

Tioga River Mine Drainage Pollution Abatement Project: Office of Research and Development, Federal Water Pollution Control Admin., Wash., D.C., Information Sheet, Project No. 14010 HIN, (June 11, 1971).

Turbidity: Environmental Protection Agency, Office of Water Programs, Division of Water Quality Standards, Wash., D.C., (May, 1972).

Underground Coal Mining Methods to Abate Water Pollution: A State of the Art Literature Review: by Coal Research Bureau (West Virginia University - Morgantown, W. Va.), for Environmental Protection Agency, Project No. 14010 FKK, (December, 1970).

Use of Latex as a Soil Sealant to Control Acid Mine Drainage: by Uniroyal, Inc. (Wayne, N.J.) for Commonwealth of Pennsylvania, Dept. of Environmental Resources, and Office of Research & Monitoring, Environmental Protection Agency, Grant 14010 EFK, (June, 1972).

Utilization of Phosphate Slimes: by International Minerals & Chemical Corporation, for Environmental Protection Agency, Project No. 14050 EPU, (August, 1971).

Water Resources of the Appalachian Region - Pennsylvania to Alabama: William J. Schneider, et. al., U.S. Dept. of the Interior, U.S. Geological Survey, Hydrologic Investigation Atlas HA - 198, (1965).

Water Pollution Control Federation Journal: Volume 42, B.380 Sprague, (March, 1970).

Water Pollution Potential of Spent Oil Shale Residues: by Colorado State University (Fort Collins, Colorado), for Environmental Protection Agency, Grant No. 14030 EDB, (December, 1971).

Water and Water Pollution Handbook: S. Ciaccio (editor), Volume 1 & 2.
