Gentlemen:

Re: Project SL 136-1

In accordance with the provisions of our service contract dated September 22, 1971, we submit the following report covering findings, conclusions, and recommendations resulting from a feasibility study to determine the mine drainage abatement measures required at abandoned mines on the Tioga River watershed in the vicinity of Morris Run, Tioga County, to effect an alkaline pool in the proposed Tioga-Hammond Lake.

Very truly yours,
